

REMARKS

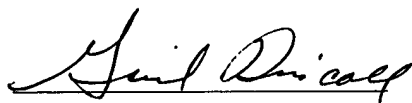

This is a preliminary amendment in which in which the title was amended to correct a spelling error, the specification was amended to make the term "up converter" consistent throughout the application and a spelling error was corrected in Fig. 7 of the drawing.

Applicant would like to call the Examiner's attention to the utility patent application transmittal where Applicant erroneously identified the priority application as "03076146.3." The correct number for the priority application is "03076146.4." This was a typographical error that Applicant would like to correct at this time.

An early and favorable action is respectfully requested.
